

QUALITY POLICY

Enamine Ltd. conducts scientific research and provides chemical compound design and synthesis services to develop new medicines. We collaborate with leading pharmaceutical and biotechnology companies and research centers worldwide.

OUR GOAL IS

to establish a quality management system that actively involves all employees in the continuous improvement of our processes. This ensures the design and synthesis of high-quality and competitive products and the provision of scientific and technical services that meet our stakeholders' needs and expectations.

In all our activities, Enamine Ltd. adheres to the following commitments:

- 01** Cherishing the Company's reputation as one of our most valuable assets is crucial; our top priorities are granting customer trust and satisfaction.
- 02** Implementing a process approach and incorporating risk-based thinking into the planning and executing the Company's projects.
- 03** Ensuring quality is managed continuously and consistently at every stage of our research and development activities.
- 04** Exercising ongoing internal control of the delivered outcomes' quality.
- 05** Ensuring a smooth and thorough transition to electronic document management.
- 06** Developing new assay techniques considering the latest market trends.
- 07** Updating and innovating our technical facilities to ensure process improvement, quick results, and high performance.
- 08** Continually enhancing the company's performance by promoting our employees' professional and personal development. Enamine highly values qualified employees and upholds top-level mastery of our team.

This Quality Policy is the basis for setting objectives at Enamine Ltd. and is reviewed annually to ensure compliance. The entire Company, from the CEO to our employees, works as a united team to uphold the Quality Policy.

Enamine's top management is committed to implementing the Quality Policy, providing timely resources, ensuring compliance with regulations and requirements, and continuously improving the Integrated Management System.
