

## QUALITY POLICY

ENAMINE LTD is a Company engaged in research and services in chemical compound design and synthesis for drug discovery. We cooperate with leading pharmaceutical and biotechnology companies and research centres globally.

### ***OUR MISSION IS***

to provide pharmaceutical and biomedical industries with a wide range of "smart" chemical solutions to support their efforts in developing new drugs and bioactive products.

Our Company has decided to compile this Policy to determine the basic principles that all employees should follow to produce high-quality and competitive products and provide research and technical services meeting consumer requirements, namely:

- 01 Cherish the Company's reputation since it is one of the most valuable assets of the Company. Customer trust and satisfaction are our most significant achievements.
- 02 Implement risk-oriented thinking in the planning and implementation of Company processes.
- 03 Manage quality continuously and systematically at all stages of research and production.
- 04 Carry out constant internal control of the results obtained with regard to their quality.
- 05 Make a consistent and complete transition to electronic document management.
- 06 Develop new analysis methods following market requirements.
- 07 Carry out technical base modernization to improve processes and ensure fast and high-quality results.
- 08 Continuously increase Company efficiency through the professional and personal development of personnel.

This Policy shall be the basis for setting respective goals in ENAMINE LTD. The Policy shall be reviewed annually to ensure compliance. All Company employees shall be a team of like-minded people implementing the Quality Policy.

The top management of ENAMINE LTD shall be responsible for implementing the Quality Policy, timely provision of necessary resources, ensuring compliance with requirements, and constant improvement of the integrated management system
